

# The Compliance Manager

## Quick Start Guide for System Users

---

The Compliance Manager is the ideal solution to track, report on, and automate the certification and license renewal processes. Offering an easy-to-use, graphical dashboard for system users, everything in the system is one click away. The Compliance Manager helps keep companies legal ensuring survivability and eliminates the hassles of scrambling to renew certifications and licenses at the last minute.

### **System Summary**

The Compliance Manager easily works into any corporate network architecture as the infrastructure is cloud-based and mobile friendly. It is fully integrated with ADIGlobalAcademy online industry courses so users can automatically track CEUs taken online. The Document Manager tool allows for storing and assigning documents to boost productivity and reduce time for renewals by as much as 80%. The Compliance Manager attaches employees to companies to track their information. Employees can request to join companies and companies can claim employees so they are appropriately attached to companies. This also allows for technicians to move to a new company and take their system information with them.

The Compliance Manager allows for automatic email distribution at the 90, 60 and 30 day mark prior to license or certification renewals being due. Users know what they need to do and when to maintain their professional designation which greatly reduces liability of unlicensed workers being in the field. Additionally, the Compliance Manager brings increased productivity and streamlined collaboration through the sharing of documents within a centralized location.

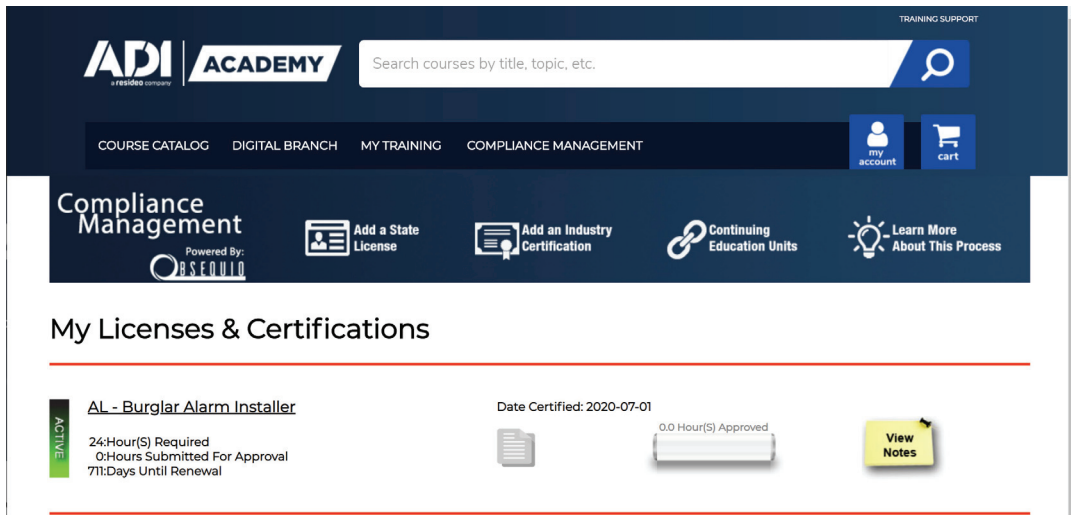

All system users can access Technical Support should they have a technical need. Support can be contacted via email at [support@adiglobalacademy.com](mailto:support@adiglobalacademy.com) and phone at 502-254-1506. Support is here to help you Monday – Friday from 8:00 AM to 8:00 PM EST.

## Quick Start Guide for System Users

### The User Interface

From the main dashboard, system users can see all the licenses and certifications being tracked for them. By scrolling through this list, the user is able to see what items are in need of attention and what items are active and need no attention at this time.

# The Compliance Manager

## Quick Start Guide for System Users

For each line item listed, the user can see quite a bit of information about the status of their certification or license. This includes the date the user was certified or licensed, how many CEUs (if any) are required to renew, the current number of applicable CEUs the student has taken, and the number of days to go until the line item expires.

The blue paper icon takes the user to the **Document Manager** tool. System users can upload one document per license or certification. Note – system administrators can upload two for a total of three documents. This feature allows the user to upload needed documentation such as a certificate of completion from a CEU course they attended. There is the ability to upload, download and delete the document.

The screenshot shows the 'Document Manager' interface. At the top, it says 'Compliance Management' and 'Document Manager'. The user's name 'Ryan Williams' and role 'AL - Burglar Alarm Installer' are displayed. On the left, there is a 'User' profile section with a person icon. In the center, there are labels for 'File Name:' and 'Date Modified:'. On the right, there are three buttons: 'UPLOAD', 'DOWNLOAD', and 'DELETE'. Below these, there is a section titled 'USER LOCKOUT STATUS' with a lock icon and the text 'The lock shows whether an administrator has locked this record.'

# The Compliance Manager

## Quick Start Guide for System Users

Once all the required documents are placed in the system, the administrator may lock the file. The lock icon lets the user know if their **Document Manager** has been put into lock down or not.

Clicking on the yellow button for **View Notes** launches the notes feature. Notes are added to the user file at the certification or license line item level. New notes can be added at any time. Historical notes cannot be edited and become a permanent part of the system record.

The screenshot shows the 'Compliance Management' interface, powered by ORSEQUIO. The page title is 'Please enter notes about: AL - Burglar Alarm Installer'. There are two text input areas: 'Previous Notes (Not Editable):' and 'Add to Notes:'. A 'Go' button is located below the 'Add to Notes' field. The footer contains the text 'Copyright 2020 © ADI Global - All Rights Reserved'.

### Submitting CEUs

For CEUs to be counted towards the renewal of a certification or license the system user must submit the CEU hours through the system. The system administrator then has the ability to add a note, perhaps to pose a question to the user, if necessary. The administrator then approves or denies the CEUs which will impact the battery graphic on the page which will fill up with each CEU added and approved.

## Quick Start Guide for System Users

### Add a State License

Users can add a license line item to their file by clicking this button. From the **Add a State License** screen users can select the license they want to add from a drop down list of available licenses. The licenses are listed by State. The user includes the date they were originally licensed. This triggers the system to tally the number of CEUs required and the renewal date for that license line item. If the license the user wants to track is not listed in the system they can get with their system administrator or email Technical Support at [support@adiglobalacademy.com](mailto:support@adiglobalacademy.com).

## Quick Start Guide for System Users

### Add an Alarm Industry Certification

Like with adding licenses, the user selects the industry certification they wish to track from a pre-defined list within the system. Additionally, the user will add the date they were initially licensed. Based on system algorithms the number of CEUs needed and by when is determined as well as the license renewal date.

If the certification the user wants to track is not listed in the system they can get with their system administrator or email Technical Support at [support@adiglobalacademy.com](mailto:support@adiglobalacademy.com) to have it added.

### Continuing Education Units

All of the CEUs taken by the user are listed on the CEU dashboard. This list includes the following information about the CEUs:

- CEU Name or Title
- Date Completed
- Training provided by
- CEUs accredited by (if different from above)
- CEU number
- CEU hours
- Which license or certification the CEU should be applied to
- Status

The screenshot displays the 'Compliance Management' dashboard. At the top, there is a navigation bar with the ADI logo and 'Powered by: O.B.S.E.Q.U.I.T.O.' Below this, there are four main navigation options: 'Add a State License', 'Add an Industry Certification', 'Continuing Education Units', and 'Learn More About This Process'. The main content area is titled 'My Licenses & Certifications' and lists two active licenses:

- AL - Burglar Alarm Installer**: Date Certified: 2020-07-01. Status: ACTIVE. Requirements: 24:Hour(S) Required, 0:Hours Submitted For Approval, 71:Days Until Renewal. A 'View Notes' button is available.
- FL - BASA/FASA**: Date Certified: 2020-07-01. Status: ACTIVE. Requirements: 6:Hour(S) Required, 0:Hours Submitted For Approval, 71:Days Until Renewal. A 'View Notes' button is available.

At the bottom of the dashboard, there is a section for training support and contact information:

- Have training questions? Give us a call.** TRAINING SUPPORT: 1.502.254.1506, Mon-Fri: 8:00am-8:00pm EST.
- EMAIL SUPPORT**: support@adiglobalacademy.com
- COMPANY INFORMATION**: Branch Locator, About Us, Careers.
- WEBSITES**: U.S., Puerto Rico, Global.
- ONLINE RESOURCES**: Course Catalog, Digital Branch.
- SUPPORT**: Training Support.
